

GI #91 Microbiocide

APPLICATION: GI #91 Microbiocide is very effective in controlling microorganisms in industrial and commercial applications. The high potency of #91 makes it excellent for use in the following areas:

Recirculating Cooling Towers
Air Washer Systems

Recirculating Process Water

BENEFITS: **VERY EFFECTIVE AGAINST ALL SPECIES OF MICROORGANISMS.
MICROORGANISMS CANNOT ADAPT TO OR BECOME RESISTANT TO
PRODUCT.
FEATURES LOW DOSAGE RATE AND SHORT CONTACT TIME.**

PHYSICAL PROPERTIES: Physical State: Yellow liquid
Odor: mild halogen odor
Solubility: miscible

DOSAGES: The initial dose of #91 is 2.50-6.25 fluid ounces per 1000 gallons of system capacity. The maintenance dose is 2.50-4.00 fluid ounces per 1000 gallons. Badly fouled systems should be cleaned prior to treatment.

TESTING & CONTROL: Dosages are controlled by visual observation of the system or the use of a #T2194 Bromine Test Kit.

HANDLING & STORAGE: Read label completely before use. See label for first aid instructions. Keep containers closed when not in use. Store containers in an area free of temperature extremes.

PACKAGING: Available in 5, 15, and 55 gallon non-returnable plastic containers.

SHIPPING: Product is shipped F.O.B. Birmingham, AL unless otherwise specified.
