

# GI #94 Microbiocide

**APPLICATION:** GI #94 Microbiocide is very effective in controlling microorganisms in industrial and commercial applications. The high potency of #94 makes it excellent for use in the following areas:

Recirculating Cooling Towers	Recirculating Process Water
Air Washer Systems	Decorative Ponds

**BENEFITS:** **VERY EFFECTIVE AGAINST ALL SPECIES OF MICROORGANISMS. MICROORGANISMS CANNOT ADAPT TO OR BECOME RESISTANT TO PRODUCT. FEATURES LOW DOSAGE RATE AND SHORT CONTACT TIME.**

**PHYSICAL PROPERTIES:** Physical State: Off-white tablets  
Odor: halogen  
Solubility: Moderately soluble in water

**DOSAGES:** The initial dose of #94 is 0.2 - 0.6 lbs. per 1000 gallons of system capacity. The maintenance dose is 0.1 - 0.3 lbs. per 1000 gallons. Badly fouled systems should be cleaned prior to treatment.

**TESTING & CONTROL:** Dosages are controlled by visual observation of the system or the use of a #T2194 Bromine Test Kit.

**HANDLING & STORAGE:** Read label completely before use. See label for first aid instructions. Keep containers closed when not in use. Store containers in an area free of temperature extremes.

**PACKAGING:** Available in 50 pound non-returnable pails.

**SHIPPING:** Product is shipped F.O.B. Birmingham, AL unless otherwise specified.
