

# GI #95 MICROBIOCIDES

**APPLICATION:** Guardian-IPCO #95 Microbiocide is a very effective biocide for controlling bacteria and fungi in industrial cooling tower and air washer systems.

**BENEFITS:** NOT AFFECTED BY HIGH DISSOLVED SOLIDS.  
BROAD SPECTRUM EFFECTIVENESS.  
COMPATIBLE WITH MOST SCALE AND CORROSION INHIBITORS.

**PHYSICAL PROPERTIES:** Physical State: green liquid  
Odor: mild, inoffensive odor  
Density: 8.5 lbs./gal.  
Solubility: Complete in water

**DOSAGES:** Initial dosage is 19.0-113.0 fluid ounces per 1000 gallons of system capacity. Subsequent dosages range from 4.5-28.0 fluid ounces per 1000 gallons system capacity as needed to maintain control. Systems which are heavily contaminated should be cleaned prior to treatment.

**TESTING & CONTROL:** Dosages are controlled by visual observation of results. Bacteria plate cultures and dip sticks may also be used.

**HANDLING & STORAGE:** Read label completely before use. See label for first aid instructions. Keep containers closed when not in use. Store containers in an area free of temperature extremes.

**PACKAGING:** Available in 5, 15, 30 and 55 gallon plastic containers.

**SHIPPING:** Product is shipped F.O.B. Birmingham, AL unless otherwise specified.
